crockett March 9, 2017, 1:36am #1. My 2005 Nissan Altima has an odd habit. I don't know how long it has been going on, I bought it in Oct and noticed the behavior shortly after. Here are some symptoms. While driving the check engine light will flash anywhere from 30 seconds to normally not more than 10 minutes.

2005 Altima Flashing Check Engine Light and lurching ...

Check engine light due to error code p0335 which is camshaft position sensor,my car hesitate to start,need more cranking, as per Nissan so many vehicles were recalled for this code but if I give my VIN # they said there is no recall, I am the original owner of this vehicle, all the maintenances are up to date and currently I have only 72000 miles, I am requesting to recall 2005 Nissan Altima as soon as possible.

Check Engine Light On Problems of the 2005 Nissan Altima ...

A bad O2 sensor is one of the most common problems that trigger check engine light on Nissan vehicles. Loose Gas Cap: A loose gas cap allows fuel fumes to escape the fuel tank. If detected by the on-board diagnostic system (OBD), it will trigger the check engine light. The missing, damaged, or loose gas cap can trigger the check engine light.

Troubleshooting Nissan Check Engine Light | YOU CANIC

2005 altima 2.5s Check engine light is on, If for some reason you don't start it on the first try, it has a hard time starting unless you pump the gas pedal while turning key. Takes about 2-3 seconds to fire, used to be instantly. I've heard fuel pump or fuel relay, too many maybes. I'm not Donald Trump! You guys are always dead on.
