## INTRODUCTION

The heart is a cone-shaped muscular organ, about the size of your fist. It is located in the mediastinum region (central region of the thoracic cavity), between the lungs, and behind the sternum.

The heart is a hollow organ, containing 4 chambers. At least one blood vessel attaches

1-semester human  
anatomy text.

The Bohensky

Dissection Series has  
been used successfully  
by more than 300,000  
biology students

nationwide. Each book  
in the series is designed  
to guide the student  
through the study of  
anatomical structures.

The books do this

# Download File PDF Anatomy

through the use of clearly marked photographs and illustrations.

Accompanying text offers the student both easy-to-follow dissection instructions and factual information about the section under observation. At the end of each chapter there are tests which can be used for self-study or for

# Download File PDF Anatomy

Lab Sheep evaluation.

Within the traditional dissection portion of a biology course, many programs include the sheep heart, eye, and brain. Within many of these guides, the author has incorporated photographs of these structures to more closely follow standard course curriculum. The author also provides

# Download File PDF Anatomy

important information on human organs such as the eye, ear, and heart. In this way, the student can better understand the role and function of these organs as they relate to human life processes. Add to this each book's large-size format, lay-flat spiral binding, and reasonable cost, and you can see why the

# Download File PDF Anatomy

Bohensky Dissection Series has become one of the most successful dissection guides used throughout this country's schools.

Purpose of study : The need for enrichment programs that exposes a diverse population of youth to health careers, is key to meeting national goals in helping

# Download File PDF Anatomy

eliminate health disparities. In this report, we describe the effectiveness of a unique and highly interactive enrichment program in garnering the interest of a diverse population of middle school students towards a career in the health field. Methods : To give youth a glimpse of life in medical school, we designed a structured

# Download File PDF Anatomy

program during the academic calendar that mimics the medical school's interactive curriculum. The workshops included but were not limited to lab practical's on human brain anatomy and sheep heart dissection, nutrition lectures, clinical skills sessions, bedside ultrasound, and robotics. The students

# Download File PDF Anatomy

were accepted through an application process. Students were sought out by their teachers and by interest in the medical field. We encouraged participation of those underrepresented in medicine by collaborating with schools in underserved areas. A feedback survey was distributed at the

# Download File PDF Anatomy

end of the program to measure the effectiveness of the program in helping them with their future goals and professional development as well as the effectiveness of the workshops. A 5-point scale was used, 1=least effective or 5 most effective. Summary of results : During the 2014-2015 academic

# Download File PDF Anatomy

year, 95 middle school students participated in the program and 57% were underrepresented in medicine. Of 95, 85 (89%) completed evaluations were collected. The average rating of the workshops ranged from 3.3 to 5.0, with anatomy lab and the medical school tour each having the highest rating of 4.7. As a result

# Download File PDF Anatomy

of this program, students gave an average rating of 4.4 out of 5 regarding their motivation to pursue a career in medicine, and a rating of 4.35 for interest in serving the underserved.

Conclusions : The Hippocrates Circle of Kaiser San Diego was very successful in promoting the interest
