Are you a creative person seeking more satisfying work? Do you want to make the transition from a job you find secure but soulless to a life built around your creative dream? Then look no further than this essential guide, written by a tenured professor who quit his job and pursued his dream as a successful “story merchant” and film producer. This book will show you how to: - Construct a life that fits your personal vision - Stand up against negative peer pressure - Redefine success in your own terms - Identify and control your conflicting inner voices - Find time to make your dreams come true - And much more! If you’re ready to fall in love with your future, this book can give you the inspiration you need to make that life-changing leap into a better world.

FOR UNIVERSITIY & COLLEGE STUDENTS IN INDIA & ABROAD Due to expanding horizon of biotechnology, it was difficult to accommodate the current information of biotechnology in detail. Therefore, a separate book entitled Advanced Biotechnology has been written for the Postgraduate students of Indian University and Colleges. Therefore, the present form of A Textbook of Biotechnology is totally useful for undergraduate students. A separate section of Probiotics has been added in Chapter 18. Chapter 27 on Experiments on Biotechnology has been deleted from the book because most of the experiments have been written in ';Practical Microbiology' by R.C. Dubey and D.K. Maheshwari. Bibliography has been added to help the students for further consultation of resource materials.

How to Prepare for CAT-MBA Entrance Exam is an attempt to guide and motivate students who aspire to prepare for MBA, specially CAT, entrance exams. • An in-depth assessment of your skills is imperative to begin your CAT - MBA preparation. ‘How to Prepare for CAT - MBA Entrance Exam’ has conceptualized the idea of analyzing your aptitude before preparing you to attain success in CAT. • The book offers you the most comprehensive tips and strategies by providing you the personalized study plan which best suits your schedule. • The various topics that the book covers are Myths & Realities, Trend Analysis of past CAT exams, Important Tips for GD and PIs, Quick Revision Tips etc. • Time management is one of the most crucial factors of the CAT preparation. So, the book provides you strategies to solve questions in minimum possible time. • The book also emphasizes on Test Taking Strategies which will help a student in devising his own strategy. • The book also accommodates the views and experiences from past years’ toppers which will help you stand a great chance of being successful in CAT and attain desired results.

The revised edition as per UGC model for B.Sc. (Pass & Honours) and M.Sc. students of all Indian Universities and also useful for competitive examinations like NET, GATE, etc. New chapters added on 'Human Immunodeficiency virus and AIDS' ' Ecological Groups of Microorganisms', 'Extremophiles Aeromicrobiology', ' Biogeochemical Cycling' and 'Pharmaceutical and Microbial Technology' besides many illustrations. The text has been made more informative. The special features include development of microbiology in the field has been provided, microbiology applications, the concept of microbiology, bacterial nomenclature, modern trends in between, etc

The use of more robust, affordable, and efficient techniques and technologies in the application of medicine is presently a subject of huge interest and demand. Technology and Medical Sciences solidifies knowledge in the fields of technology and medical sciences and to define their key stakeholders. The book is designed for academics in engineering, mathematics, medicine, biomechanics, computation sciences, hardware development and manufacturing, electronics and instrumentation, and materials science.

With information for patients and practitioners on optimizing mitochondrial function for greater health and longevity Why do we age? Why does cancer develop? What's the connection between heart failure and Alzheimer's disease, or infertility and hearing loss? Can we extend lifespan, and if so, how? What is the Exercise Paradox? Why do antioxidant supplements sometimes do more harm than good? Many will be amazed to learn that all these questions, and many more, can be answered by a single point of discussion: mitochondria and bioenergetics. In Mitochondria and the Future of Medicine, Naturopathic Doctor Lee Know tells the epic story of mitochondria, the widely misunderstood and often-overlooked powerhouses of our cells. The legendary saga began over two billion years ago, when one bacterium entered another without being digested, which would evolve to create the first mitochondrion. Since then, for life to exist beyond single-celled bacteria, it's the mitochondria that have been responsible for this life-giving energy. By understanding how our mitochondria work, in fact, it is possible to add years to our lives, and life to our years. Current research, however, has revealed a dark side: many seemingly disconnected degenerative diseases have tangled roots in dysfunctional mitochondria. However, modern research has also endowed us with the knowledge on how to optimize its function, which is of critical importance to our health and longevity. Lee Know offers cutting-edge information on supplementation and lifestyle changes for mitochondrial optimization, such as CoQ10, D-Ribose, cannabinoids, and ketogenic dietary therapy, and how to implement their use successfully. Mitochondria and the Future of Medicine is an invaluable resource for practitioners interested in mitochondrial medicine and the true roots of chronic illness and disease, as well as anyone interested in optimizing their health.
