Leviathan. Discover new mysterious animals like the giant serpents of Central America, the lethal Mongolian death worm, and the Ennedi tiger in Africa, and investigate the evidence for sightings of Bigfoot and the reclusive Yeti. Packed with quirky line illustrations and a wealth of weird and wonderful information, Breverton's Phantasmagoria surveys the globe to uncover over 250 imaginary creatures passed down from generation to generation.

A superbly illustrated guide to the mysteries of myth, legend, and real life.

Breverton's Nautical Curiosities is about ships, people and the sea. However, unlike many other nautical compendiums, the focus of this book is on the unusual, the overlooked or the downright extraordinary. Thus, someone most of us do not know, Admiral William Brown, is given equal coverage to Admiral Nelson. Without Admiral Brown releasing Garibaldi, modern Italy might not exist. And without the barely known genius John Ericsson designing the Monitor, the Confederacy might have won the American Civil War. Readers will be stimulated to read more about the remarkable men - explorers, admirals and trawlermen - who have shaped our world. The sea has had a remarkable effect upon our language. We hear the terms 'steer clear of', 'hit the deck', 'don't rock the boat', 'to harbour a grudge' and the like, and give little thought to them. In the pages of this book, the reader will find the origin of 'bumpkin', a 'brace of shakes', 'born with a silver spoon', 'booby prize', 'to take on board', 'above board', 'bombed' (in the sense of being drunk), the 'blues', 'blind-side', 'blind drunk', 'the pot calling the kettle black', 'reach the bitter end', 'wasters', 'ahoy', 'all at sea', 'to keep aloof', 'piss-artist', 'taken aback', 'barbecue' and 'bamboozle'. Other colourful terms, which have passed out of common usage, such as 'bring one's arse to anchor' (sit down), 'belly timber' (food) and 'bog orange' (potato) are also included, as well as important pirate haunts, technical terms, famous battles, maritime

inventors and ship speed records.

Breverton's Complete Herbal is a modern reworking of Culpeper's classic reference guide, Culpeper's Complete Herbal. Arranged alphabetically, this book describes over 250 herbs and spices as well as feature entries on scented herb/medicinal gardens, the great herbalists and New World Herbs not included in Culpeper's original text. Each entry provides a description of the herb: its appearance and botanical features, a brief history of its uses in medicine, dyeing and cuisine to bizarre remedies and concoctions designed to get rid of all manner of real and imaginary ailments. As informative as it is entertaining, this incredibly diverse compendium contains just about everything you'll ever need to know about the properties and provenance of herbs and spices of the world. From amara dulcis to yarrow, all-heal to viper's bugloss, Breverton's Complete Herbal is a modern day treasury of over 250 herbs and their uses.

Invention and innovation are what distinguish the human race from all of the other species on Earth. Throughout history the imagination and pioneering spirit of human kind has compelled us to question why we do things in a certain way and, more importantly, how we can do things better. Celebrating the ingenuity, creativity and resourcefulness that has led to some of the most amazing technological leaps through the ages, Breverton's Encyclopedia of Inventions examines the key innovations and breakthroughs of all time and the genius behind them. Starting with the building of the pyramids in ancient Egypt and the discovery of the solar system, moving through surgery, dynamite and rockets, to modern technology such as the smart card and genetic engineering, Terry Breverton springs many surprises. He uncovers fascinating and little-known facts: for example, that Price, not Fleming, discovered penicillin; that Swan, not Edison invented the electric light, and that Wallace, not Darwin first advanced the theory of

Mythology evolution. Tracing the sheer persistence of brilliant men and women across the globe, who fought the prevailing ideas of their times and advanced technology, Breverton's Encyclopedia of Inventions will inspire anyone interested in the history and developments that have changed our lives and shaped our planet's future.

Presents entries on creatures and legends from around the world, featuring mythic entities including dragons, serpents, golems, banshees, nature spirits, and sacred beings.

A guide to the ancient symbols and sites of the Southwest's most iconic image

From controversial cryptozoologist and explorer Dr. Veronica Wiggerht-Blackwater, *The Compendium of Magical Beasts* is a definitive field guide that explores the history, biology, and anatomy of mythological creatures. Approaching the fantastic with a scientific eye, Dr. Wiggerht-Blackwater explains the history, habits, and biology of each creature's existence with equal attention to detail. Her research is accompanied by stunning scientific illustrations of each specimen's anatomy, providing a comprehensive view of creatures most often dismissed as pure fantasy. Combining biological fact with folklore, cultural studies, and history, this volume is crucial to science both fringe and mainstream. Locked in a dusty attic for almost a century, Dr. Wiggerht-Blackwater's trailblazing work was recently discovered by writer Melissa Brinks, who spent months transcribing the journals she found. Brinks joined forces with artist Lily Seika Jones to digitize the doctor's amazingly detailed anatomical diagrams in order to share these revolutionary findings with the world for the first time. *The Bestiary: Mermaid, Unicorn, Wild Man, Gnome, Werewolf, Troll, Fairy, Jackalope, Winged Horse, Centaur,*

Incubus/Succubus, Nymph, Ghoul, Selkie, Kelpie

An extraordinary biography. A gallery of astonishing work. The legacy of a madman. Philadelphia, the late 1870s. A city of gas lamps, cobblestone streets, and horse-drawn carriages—and home to the controversial surgeon Dr. Spencer Black. The son of a grave robber, young Dr. Black studies at Philadelphia's esteemed Academy of Medicine, where he develops an unconventional hypothesis: What if the world's most celebrated mythological beasts—mermaids, minotaurs, and satyrs—were in fact the evolutionary ancestors of humankind? The Resurrectionist offers two extraordinary books in one. The first is a fictional biography of Dr. Spencer Black, from a childhood spent exhuming corpses through his medical training, his travels with carnivals, and the mysterious disappearance at the end of his life. The second book is Black's magnum opus: *The Codex Extinct Animalia*, a Gray's Anatomy for mythological beasts—dragons, centaurs, Pegasus, Cerberus—all rendered in meticulously detailed anatomical illustrations. You need only look at these images to realize they are the work of a madman. The Resurrectionist tells his story.
