The two-volume set, LNCS 9326 and LNCS 9327 constitutes the refereed proceedings of the 20th European Symposium on Research in Computer Security, ESORICS 2015, held in Vienna, Austria, in September 2015. The 59 revised full papers presented were carefully reviewed and selected from 298

Online Library Computer

Practical submissions. The papers address issues such as networks and Web security; system security; crypto application and attacks; risk analysis; privacy; cloud security; protocols and attribute-based encryption; code analysis and side-channels; detection and monitoring; authentication; policies;

Online Library Computer

and applied security.

Solution 2014

This volume of
Advances in Intelligent
Systems and Computing
contains accepted
papers presented at
ICGEC 2015, the 9th
International
Conference on Genetic
and Evolutionary
Computing. The
conference this year was
technically co-

Online Library Computer

sponsored by Ministry
of Science and
Technology, Myanmar,
University of Computer
Studies, Yangon,
University of Miyazaki
in Japan, Kaohsiung
University of Applied
Science in Taiwan,
Fujian University of
Technology in China
and VSB-Technical
University of Ostrava.
ICGEC 2015 is held

Online Library Computer

from 26-28, August, 2015 in Yangon, Myanmar. Yangon, the most multiethnic and cosmopolitan city in Myanmar, is the main gateway to the country. Despite being the commercial capital of Myanmar, Yangon is a city engulfed by its rich history and culture, an integration of ancient traditions and spiritual

Online Library Computer

heritage. The stunning SHWEDAGON Pagoda is the center piece of Yangon city, which itself is famous for the best British colonial era architecture. Of particular interest in many shops of Bogyoke Aung San Market, and of world renown, are Myanmar's precious stones-rubies, sapphires and jade. At night time,

Online Library Computer

Chinatown comes alive with its pungent aromas and delicious street food. The conference is intended as an international forum for the researchers and professionals in all areas of genetic and evolutionary computing.

We generate and gather a lot of data about ourselves and others,

Online Library Computer

some of it highly confidential. The collection, storage and use of this data is strictly regulated by laws, but restricting the use of data often limits the benefits which could be obtained from its analysis. Secure multi-party computation (SMC), a cryptographic technology, makes it possible to execute

Online Library Computer

specific programs on confidential data while ensuring that no other sensitive information from the data is leaked. SMC has been the subject of academic study for more than 30 years, but first attempts to use it for actual computations in the early 2000s – although theoretically efficient – were initially not

Online Library Computer

practicable. However, improvements in the situation have made possible the secure solving of even relatively large computational tasks. This book describes how many different computational tasks can be solved securely, yet efficiently. It describes how protocols can be combined to larger

Online Library Computer

Practical, and how the security-efficiency trade-offs of different components of an SMC application should be chosen. Many of the results described in this book were achieved as part of the project Usable and Efficient Secure Multi-party Computation (UaESMC), which was funded by the European

Online Library Computer

Practical. The book will be of interest to all those whose work involves the secure analysis of confidential data.

The two-volume proceedings LNCS 9665 + LNCS 9666 constitutes the thoroughly refereed proceedings of the 35th Annual International

Online Library Computer

Conference on the
Theory and
Applications of
Cryptographic
Techniques,
EUROCRYPT 2016,
held in Vienna, Austria,
in May 2016. The 62
full papers included in
these volumes were
carefully reviewed and
selected from 274
submissions. The papers
are organized in topical

Online Library Computer

sections named:
(pseudo)randomness;
LPN/LWE;
cryptanalysis; masking;

2015 File Type

Assistive Technology (AT) is the term used to describe products or technology-based services which support those with disabilities or other limitations to their daily activities, enabling them to enjoy a better quality of life. This book presents the proceedings of the 13th

Online Library Computer

European Conference
on the Advancement of
Assistive Technology
(AAATE 2015), held in
Budapest, Hungary in
September 2015. This
biennial conference has
established itself as a
leading forum in the
transdisciplinary area of
Assistive Technology,
providing a unique
platform for the
gathering of experts

Online Library Computer

from around the world to review progress and challenges in the interdisciplinary fields which contribute to AT, such as research, development, manufacturing, supply, provision and policy. The theme of the 2015 conference is 'Attracting new areas and building bridges', and this book contains 138 reviewed

Online Library Computer

papers and 28 poster presentations delivered at the conference, covering AT themes as diverse as aging, blindness, mobility, assisted living and accessibility for people with dementia and cognitive impairment. Offering a current overview of many aspects of AT, this book will be of interest to all

Online Library Computer

those – from researchers and manufacturers to healthcare professionals and end-users – whose work or daily life involves the relationship between technology and disability.

Worldwide, the population ageing is a reality. The concept of Active Ageing, adopted by the World Health

Online Library Computer

Organization, aims to guarantee quality ageing and appears as a strategy to solve this demographic challenge. The technological solutions might have a key role in the promotion of human functioning and in the mitigation of disabilities, particularly those resulting from the natural ageing process.

Online Library Computer

This perspective is evident in the development of Ambient Assisted Living (AAL) solutions. In this context, it is relevant to know about the recent developments in AAL and discuss future trends and challenges in this area. One of the objectives of this book is to do a systematic literature

Online Library Computer

review on AAL, not only considering the technology used, but also the health condition that is intended to improve. For this purpose, we consider the human functioning, in particular the conceptual model of International Classification of Functioning, Disability and Health (ICF).

Online Library Computer

Considering that the ICF conceptual framework is accepted within the healthcare domain, the use of its concepts and terminologies to promote multidisciplinary approaches for AAL solutions development processes can help to overcome difficulties of communication between users, careers and

Online Library Computer

Practical
technological

developers. AAL solutions must consider in their development the needs of the person that will use AAL solutions. The development must be user-centred and usability questions cannot be forgotten. In addition, the acceptance of the AAL solutions is closely related to the quality of the systems,

Online Library Computer

so it is necessary to
appropriately assess
these solutions.

Smart Delivery
Systems: Solving
Complex Vehicle
Routing Problems
examines both exact and
approximate methods
for delivering optimal
solutions to rich vehicle
routing problems,
showing both the

Online Library Computer

Practical and disadvantages of each approach. It shows how to apply machine learning and advanced data analysis techniques to improve routing systems, familiarizing readers with the concepts and technologies used in successfully implemented delivery systems. The book

Online Library Computer

explains both the latest theoretical and practical advances in intelligent delivery and scheduling systems and presents practical applications for designing new algorithms for real-life scenarios. Emphasizes both sequential and parallel algorithms. Uniquely combines methods and algorithms, real-life applications,

Online Library Computer

and parallel computing

Includes

recommendations on
how to choose between
different methods for
solving applications

Provides learning aids,

references,
bibliography, worked
examples and exercises

This book constitutes
the refereed proceedings

Online Library Computer

of the 11th IFIP WG 8.9
Working Conference on
Research and Practical
Issues of Enterprise
Information Systems,
CONFENIS 2017, held
in Shanghai, China, in
October 2017. The 17
full papers presented in
this volume were
carefully reviewed and
selected from 39
submissions. They were
organized in topical

Online Library Computer

sections named: EIS concepts, theory and methods; IoT and emerging paradigm; EIS for industry 4.0; big data analytics; and intelligent electronics and systems for industrial IoT.

Broad coverage of digital product creation, from design to manufacture and process optimization

Online Library Computer

This book addresses the need to provide up-to-date coverage of current CAD/CAM usage and implementation. It covers, in one source, the entire design-to-manufacture process, reflecting the industry trend to further integrate CAD and CAM into a single, unified process. It also updates the computer aided design

Online Library Computer

theory and methods in modern manufacturing systems and examines the most advanced computer-aided tools used in digital manufacturing.

Computer Aided Design and Manufacturing consists of three parts.

The first part on Computer Aided Design (CAD) offers the chapters on Geometric

Online Library Computer

Modelling; Knowledge
Based Engineering;
Platforming
Technology; Reverse
Engineering; and
Motion Simulation. The
second part on
Computer Aided
Manufacturing (CAM)
covers Group
Technology and
Cellular Manufacturing;
Computer Aided Fixture
Design; Computer

Online Library Computer

Aided Manufacturing;
Simulation of
Manufacturing
Processes; and

Computer Aided Design
of Tools, Dies and
Molds (TDM). The final
part includes the
chapters on Digital
Manufacturing;
Additive
Manufacturing; and
Design for
Sustainability. The book

Online Library Computer

is also featured for
being uniquely
structured to classify
and align engineering
disciplines and
computer aided
technologies from the
perspective of the
design needs in whole
product life cycles,
utilizing a
comprehensive
Solidworks package
(add-ins, toolbox, and

Online Library Computer

library) to showcase the most critical functionalities of modern computer aided tools, and presenting real-world design projects and case studies so that readers can gain CAD and CAM problem-solving skills upon the CAD/CAM theory. Computer Aided Design and Manufacturing is an ideal textbook for

Online Library Computer

undergraduate and graduate students in mechanical engineering, manufacturing engineering, and industrial engineering. It can also be used as a technical reference for researchers and engineers in mechanical and manufacturing engineering or computer-aided technologies.

Online Library Computer

This volume includes the Proceedings of the 24th International Conference on Robotics in Alpe-Adria-Danube Region, RAAD 2015, which was held in Bucharest, Romania, on May 27-29, 2015. The Conference brought together academic and industry researchers in robotics from the 11 countries affiliated to

Online Library Computer

the Alpe-Adria-Danube
space: Austria, Croatia,
Czech Republic,
Germany, Greece,
Hungary, Italy,
Romania, Serbia,
Slovakia and Slovenia,
and their worldwide
partners. According to
its tradition, RAAD
2015 covered all
important areas of
research, development
and innovation in

Online Library Computer

robotics, including new trends such as: bio-inspired and cognitive robots, visual servoing of robot motion, human-robot interaction, and personal robots for ambient assisted living. The accepted papers have been grouped in nine sessions: Robot integration in industrial applications; Grasping analysis, dexterous

Online Library Computer

grippers and component design; Advanced robot motion control; Robot vision and sensory

control; Human-robot interaction and collaboration;

Modelling and design of novel mechanisms and robotic structures;

Robots in medicine and rehabilitation; Tracking systems and Unmanned Aerial Vehicles;

Online Library Computer

Autonomous task
learning, motion
planning and
scheduling.
