Engine Start / Test / Run Stand - Build your own - YouTube

In order to find out where to place the rear mounting plate, I test mounted the engine on the stand. Once I determined where to install the plate, I welded four long welds on the sides to give it the most strength possible. With the slits in the mounting plate, I can move the arms to adjust for different size engines.

Easy-Run Engine Test Run Stands

I decided that it would be nice to have an engine run-in stand. place to bolt a motor, then fire it up and run it for break-in, tuning, and to find and fix any problems, such as leaks, before doing the final motor installation. You can buy engine run-in stands, but they aren't cheap, and then involve truck shipping since they are so large.

Engine Stand Project - Laine Family

I built my test/ run-in stand for my 427 Fords from a simple Stumpy's holding stand- I got the "W" type, wider so it will clear T-pans. I bolted it to an old strong warehouse cart with HD casters, made a mount on the front to hold a big station wagon radiator with a WallyWorld \$20 box fan in front of it, and simple adjustable mounts to tie a bellhousing on the other end.

DIY Engine Break-In Stand - How To Design And Build A ...

This also makes mounting a new engine easy as I can set it up using the drill press and workbench and then attach the assembly to the test stand as a single unit. I do still drill holes in the fixed rear plate for the throttle pushrod if necessary, but these are quite a way from the 1/4-20 fasteners in the corners that hold the sandwich together.

Mighty Mount - World Best Engine Test Stand - Engine Stand ...

While doing some research I came across a Fly RC magazine article from 2010 titled Build an Engine Test Stand and I knew it was the one for me. Firstly, it uses a Black and Decker Workmate as a base, and I already have one. Secondly, it uses a modular plate system which could mean a plate for each engine I test.

Amazon.com: engine test stand

They are 26" wide (o.s. to o.s) at the back leg and 20" apart at the far end. This allows you to roll an cherry picker up to the stand and mount the engine directly to the stand. Here's a little closer view of the leg stub. The hinge pieces or saddles SHOULD BE fabbed from 3.5" tubing with a 1/4" wall thickness.
