sufficient rigour. Drawing from the disciplines of anthropology, linguistics, literary studies and modern languages, the contributors in this volume apply themselves to a number of key theoretical questions pertaining to travel writing and ethics, ranging from travel-as-commoditization to encounters with minority languages under threat. Taken collectively, the essays assess key critical legacies from parallel disciplines to the debate so far, such as anthropological theory and postcolonial criticism. Also considered, and of equal significance, are the ethical implications of the form's parallel genres of writing, such as ethnography and journalism. As some of the contributors argue, innovations in these genres have important implications for the act of theorizing travel writing itself and the mode and spirit in which it continues to be conducted. In the light of such innovations, how might ethical theory maintain its

A number of developments in the museum movement during the last few years have forced museums to give greater attention to ethical issues. Members of a profession are increasingly regarded as constituting an ethical community. Every person with such a community must have a sense of personal obligation as well as a responsibility for others to assure ethical achievement. This volume firmly places notions of ethics in the field of action. Museum Ethics considers the theoretical and practical elements of the philosophy of conduct in relation to critical contemporary issues and museums. This discussion encompasses the procurement of artifacts, the rights of indigenous peoples, repatriation, the politics of display, the conservation of objects and the role of education, as well as the day-to-day management of a museum. All persons active in museum matters, whether custodian, curator, or trustee have an ethical

choosing the right course of action. The choice of the course of action is based on moral reasoning and there is no single moral theory on which we can base the choices that we make. The application of moral standards in life is also the concern of Ethics: Theory and Practice, which deals with moral theories in Indian and Western philosophical traditions as well as the debates that centre around their application. The book has ten chapters-the first chapter presents what morality and moral reasoning is; the second chapter is.
