Gregory P. Rys, DNP/FNP-BC Family Nurse Practitioner Primary Care , Family Medicine, TeleHealth

Newly revised and updated to more thoroughly address our increasingly digital world, including integration of digital records and audiovisual records into each chapter, it remains the clearest and most comprehensive guide to the discipline.

This engaging text offers a brief, readable description of our common Western heritage. Providing a tightly focused narrative and interpretive structure, Brian A. Pavlac covers the basic historical information that all educated adults should know. His joined terms "supremacies and diversities" develop major themes of conflict and creativity throughout history. The text is also informed by five other topical themes: technological innovation, migration and conquest, political and economic decision-making, church and state, and disputes about the meaning of life. Written with flair, this easily accessible yet deeply knowledgeable text provides all the essentials for a course on Western civilization.
