friendly book available for those studying Human Resource Management in South Africa. Written from a business management perspective, it not only addresses the traditional core Human Resource activities but also provides the reader with insight into future Human Resource challenges.

The 2nd edition of this guide includes updates on new legislation, such as the Employment Equity and Basic Conditions of Employment Act. It focuses on the knowledge and skills that managers need.

**Book & CD.** This fourth edition makes it clear that all who are interested in the sustainability of South Africa -- and Africa -- must put human resource management (HRM) at the very core of the management of organisations generally. The content is aligned to outcomes that are geared towards analytical and critical thinking about the theory and practice of HRM in South Africa. The African context is addressed, and ample information about HRM aspects 'elsewhere in Africa' is provided. This edition breaks away even further from the traditional structure of so many standard HRM textbooks. It challenges a broadening of the 'agenda' and scope of HRM work: HRM is not only about managing employees, but also about managing the work and the people who do the work of and in organisations. This may involve alternative ways of getting the work of organisations done superiorly. This book will help you to apply HRM effectively to achieve its ultimate aim, namely to add value to people, to organisations and to society. This comprehensive book is organised around themes such as: Developing an appreciation for the context of HRM in South Africa; Strategising, designing and planning as preparatory HRM work; Sourcing work talent; Facing the countrys people empowerment challenge; Meeting the reward and care challenge; Handling labour and employee relations challenges; Championing change and transformation; Managing HRM-related information, including HRM and sustainability reporting. Based on most recent theoretical developments, the emphasis is on the practical applications. Samples of relevant documents are included, and an accompanying CD contains a wealth of relevant resources as well as a continuing, integrating case study that serves as a basis for these applications, and individual and group activities. As a package, South African Human Resource Management will be extremely valuable to both current and aspirant managers, and human resource practitioners.

This book focuses on human resource management (HRM) in the country context of Brunei Darussalam, analysing, comparing and contrasting domestic enterprises (DEs) with multinational enterprises (MNEs), and oil and gas with non-oil and -gas sectors, and draws out the comparative lessons for understanding the potential and performance consequences of HR interventions in resource-centred national economies. Work carried out more recently drawing a contrast between Asian capitalisms has established a number of important defining aspects inherent in economies in Asia; this helps to present approaches to establishing the way in which Brunei may be seen to be aligned with, and depart from, other business systems and frameworks in Asia. The existing literature highlights a trend towards focusing on the Asian context; however, most studies have focused on specific Asian countries, and research conducted in other contexts remains scarce. As the region gains economic prosperity, it is increasingly important to conduct some work that will be able to highlight the relevant HRM system(s) for other Asian contexts. Although some emerging Asian economies are still quite far from achieving developed nation status, it is however essential to understand the HRM systems prevalent in such economies as they can contribute greatly to the economic development there. Hence, this book highlights the importance of viewing the development and nature of HR in Brunei and locates the practice of HRM within the wider economic and political context, and draws out the theoretical and practical implications for understanding continuity in change in HR practice, and similarities with and differences from other emerging markets. It will be of interest to researchers, academics, and students in international and comparative human resource management.

This refreshing book offers an alternative perspective on a growing subject area. It boldly tackles the HR challenges in countries spanning the African continent, examining the impact of contextual factors on the development of HR practices.

Human resource management (HRM) is the predominant apparatus for people management across the world. Since its inception, HRM has nevertheless been subjected to critical scrutiny. This work has produced a corpus of literature now referred to as 'Critical HRM'. This book on Critical HRM traces the development of the critical scholarly tradition in people management. It analyzes, organizes and synthesizes the various perspectives, ideas and arguments that constitute this critical tradition. The book identifies the current status and future trends of Critical HRM, and explores its ethico-political role in contemporary organizations, especially in the context of widespread public concern about making business more ethical. Incorporating under-researched and emerging issues of people management, such as the Global South and Critical HRM, with more established themes of Critical HRM, this book introduces Critical HRM's critique of mainstream HRM and its underpinning assumptions. It illustrates how interventions have the potential to transform organizational policies and practices of managing people at work. The book will be of interest to professionals, researchers, and academics focusing on critical issues in people management across the Global South and North.

In this book, Korean multinational enterprises management strategies in China are analyzed. China is re centering Asia around its newfound economic might, even as neighboring countries such as Japan and Korea will remain more economically developed for generations to come. How do Asian companies adapt to the Chinese market? In this fascinating study, Haiying Kang and Jie Shen investigate how Korean enterprises have adapted human resources practices to the evolving corporate climate in China. Unorthodox blends of culture, legal expectations, and more make the market a truly interesting one to explore HRM practices on the margins. Compelling for academics in HRM but also related social sciences, HR practitioners, and corporate leaders alike, this book is a timely look at new Asian corporate cultures.

Human Resource Management (HRM) is fundamentally shaped by institutional and cultural factors, such as the different political environments and social philosophies of particular countries and regions. By examining the various organizational aspects of business life and systems of people management in Asia, the study of HRM across the continent can, therefore, give us a greater understanding of Asian societies, as well as the contemporary world of work more generally. This handbook provides an up-to-date and intellectually engaging overview of HRM in the Asian context. Distinctive in its comprehensive coverage of traditional as well as emerging topics of HRM, it analyzes important themes, such as the regulatory framework for work and employment, religiosity, family business, and gender. Using a comparative approach, it also effectively highlights the unique features of each country's attitudes towards HRM. Covering a range of themes and case studies, sections include: • Institutional and cultural contexts, • Labour regulation and industrial relations, • Thematic and functional HRM, • HRM in selected Asian countries, such as China, Japan, Vietnam, India, and Singapore. Written in a highly accessible style, this book will be useful to students and scholars of Human Resource Management, Asian Business, Economics, and Sociology.
