Written to support and enhance assessment alongside the pupil texts, these resources offer a range of material for the OCR specification. They provide test questions for each chapter together with detailed mark schemes to make assessment easy. Two versions of each question are provided, one allows pupils to write their answers in the spaces provided and the other requires pupils to have separate writing paper. Questions can be grouped according to needs. Master grids are provided to cut and paste tests together in a consistent format to use the resource in any order. Chapter tests can be grouped to form a module test after chapters. End-of-chapter examinations can also be produced in this way. A free non-calculator supplement organised by unit/chapter is also included in this resource.

Service and network providers must be able to satisfy the demands for new services; improve the quality of service; reduce the cost of network service operations and maintenance; control performance; and adapt to user demands. It is essential to investigate different approaches for performing such tasks. One of these approaches is based on policies and the capability of the network to adapt itself to current conditions. With a focus on policy-based networking, this volume addresses the problem of network control and the introduction of policies such as the control of the Quality of Service, security, mobility, performance, mobile and intelligent agents, and traffic engineering. The area of control in networks through policies promises to provide stimulating challenges for years to come. This book is an attempt to answer questions and provide some direction about the best approaches to be followed. This volume contains the proceedings of the first International Conference on NETwork CONtrol and Engineering (NETCON) for Quality of Service, Security and Mobility, which was sponsored by the International Federation for Information Processing (IFIP), and organized by IFIP TC6 Working Group 6.7 (Smart Networks). The conference convened in Paris, France in October 2002.

This book constitutes the refereed proceedings of the First EurAsian Conference on Information and Communication Technology, EurAsia-ICT 2002, held in Shiraz, Iran, in October 2002. The 116 revised full papers presented were carefully reviewed and selected from more than 300 submissions. The papers are organized in topical sections on artificial intelligence, data mining, multimedia, security, neural networks, data and knowledge engineering, XML, mobile communication, computer graphics, digital libraries, natural language processing, Internet and QoS, information society, e-learning, mobile Web information systems, wireless communications, Web-based applications, intelligent agents, real-time systems, software engineering, algorithms, and theoretical computer science.

The revised edition of the highly successful first edition, which has established itself as the student reference guide for student teachers of history.

Comprehensive second editions of History for the IB Diploma Paper 1, revised for first teaching in 2015.

- Engineering: back to the future - Socio-economic impacts - Engineering highlights - Conserving our liquid assets - International perspectives

The post-16 sector is the focus of great change in education and this book provides all teaching professionals with a guide to exploring and developing successful teaching in this new environment. With contributions from education experts and subject specialists, this book addresses the issues that now face teachers at post-16. It guides readers through the new requirements in a simple and accessible way; looks at teaching and learning issues in detail and considers the professional development of those teaching at this level. Essential reading for all post-16 teachers in schools and colleges.
