straightforward presentation of complex topics. For the Eighth Edition, this successful formula has been refined with updated research, applications, and links to an enhanced Microbiology Place Website/CD-ROM. Supported by a powerful new Art and Photo CD-ROM for instructors, this new edition provides the most current coverage, technology, and applications for microbiology students.

For general microbiology laboratory courses Laboratory Experiments in Microbiology features 57 thoroughly class-tested and easily customizable exercises that teach basic microbiology techniques and applications. The manual provides comprehensive coverage of every area of microbiology across diverse disciplines, including the biological sciences, allied health sciences, agriculture, environmental science, nutrition, pharmacy, and various pre-professional programs. The lab manual is the perfect companion to Tortora/Funke/Case's Microbiology: An Introduction, 13th Edition or any introductory microbiology text. The 12th Edition of Laboratory Experiments in Microbiology is easier than ever to navigate and more visually effective with new icons indicating when an exercise addresses the human or environmental microbiome, is investigative, or addresses an ASM guideline. New ASM Thinking Skills outline the steps that help develop laboratory thinking skills. Pre-lab quizzes in Mastering(tm) Microbiology ensure students arrive prepared for each lab, and activities such as Lab and Lecture: Putting It All Together help students see how lab and lecture are integrated.

This book is designed for non-major students in microbiology. It is praised for its straightforward presentation of complex topics, careful balance of concepts and applications, and proven art that teaches. In its Tenth Edition, Tortora/Funke/Case responds to the challenge of the microbiology course: teaching a wide range of reader levels, while still addressing reader under-preparedness.

For courses in Microbiology Lab and Nursing and Allied Health Microbiology Lab A Flexible Approach to the Modern Microbiology Lab Easy to adapt for almost any microbiology lab course, this versatile, comprehensive, and clearly written manual is competitively priced and can be paired with any undergraduate microbiology text. Known for its thorough coverage, straightforward procedures, and minimal equipment requirements, the Eleventh Edition incorporates current safety protocols from governing bodies such as the EPA, ASM, and AOAC. The new edition also includes alternate organisms for experiments for easy customization in Biosafety Level 1 and 2 labs. New lab exercises have been added on Food Safety and revised experiments, and include options for alternate media, making the experiments affordable and accessible to all lab programs. Ample introductory material, engaging clinical applications, and laboratory safety instructions are provided for each experiment along with easy-to-follow procedures and flexible lab reports with review and critical thinking questions.

This #1 selling non-majors microbiology book is praised for its straightforward

presentation of complex topics, careful balance of concepts and applications, and proven art that teaches. In its Tenth Edition, Tortora/Funke/Case responds to the #1 challenge of the microbiology course: teaching a wide range of reader levels, while still addressing reader under-preparedness. The Tenth Edition meets readers at their respective skill levels. First, the book signals core microbiology content to readers with the new and highly visual Foundation Figures that readers need to understand before moving forward in a chapter. Second, the book gives readers frequent opportunities for self-assessment with the new Check Your Understanding questions that correspond by number to the chapter Learning Objectives. Then, a new "visual learning" orientation includes: an increased number of the popular Diseases in Focus boxes, newly illustrated end-of-chapter Study Outlines that provide students with visual cues to remind them of chapter content, and new end-of-chapter Draw It questions. The all-new art program is contemporary without compromising Tortora/Funke/Case's hallmark reputation for precision and clarity. Content revisions include substantially revised immunity chapters and an increased emphasis on antimicrobial resistance, bioterrorism, and biofilms. The new Get Ready for Microbiology workbook and online practice and assessment materials help readers prepare for the course. The Microbial World and You, Chemical Principles, Observing Microorganisms Through a Microscope, Functional Anatomy of Prokaryotic and Eukaryotic Cells, Microbial Metabolism, Microbial Growth, The Control of Microbial Growth, Microbial Genetics, Biotechnology and Recombinant DNA, Classification of Microorganisms, The Prokaryotes: Domains
