Identify the general functions of the muscular system Motion by moving the skeletal levers of the body Posture - stabilizing body positions Regulation of organ volume Thermogenesis - heat production Protection of internal organs 2. Define the four characteristics of muscular tissue a.

*Chapter 4 The Muscular System Answers*

muscleis a general term for all contractile tissue. The term musclecomes from the Latin word mus, which means "mouse," because the movement of muscles looks like mice running around under our skin. The contractile property of muscle tissue allows it to become short and thick in response to a nerve impulse.
