He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and "administrative" charges Diesel annual urea fill-up scams cancost you \$300, including an \$80 "handling" charge for \$25 worth of urea Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki</p> <p>INTERNATIONAL BESTSELLER "For anyone who wants to understand capitalism not as economists or politicians have pictured it but as it actually operates, this book will be invaluable."-Observer (UK) If you've wondered how we did not see the economic collapse coming, Ha-Joon Chang knows the answer: We didn't ask what they didn't tell us about capitalism. This is a lighthearted book with a serious purpose: to question the assumptions behind the dogma and sheer hype that the dominant school of neoliberal economists-the apostles of the freemarket-have spun since the Age of Reagan. Chang, the author of the international bestseller Bad Samaritans, is one of the world's most respected economists, a voice of sanity-and wit-in the tradition of John Kenneth Galbraith and Joseph Stiglitz. 23 Things They Don't Tell You About Capitalism equips readers with an understanding of how global capitalism works-and doesn't. In his final chapter, "How to Rebuild the World," Chang offers a vision of how we can shape capitalism to humane ends, instead of becoming slaves of the market.</p> <p>General Motors and IBM have been battered to their cores. Jack Welch, the chairman of General Electric, called the frenzied competition of the 1980's "a white knuckle decade" and said the 1990s would be worse. In this pathbreaking book that will define this new age of "hypercompetition," Richard D'Aveni reveals how competitive moves and countermoves escalate with such ferocity today that the traditional sources of competitive advantage can no longer be sustained. To compete in this dynamic environment, D'Aveni argues that a company must fundamentally shift its strategic focus. He constructs a brilliant operational model that shows how firms move up "escalation ladders" as advantage is continually created, eroded, destroyed, and recreated through strategic maneuvering in four arenas of competition. Using this "Four Arena" analysis, D'Aveni explains how competitors engage in a struggle for control by seeking leadership in the arenas of "price and quality," "timing and know-how," "stronghold creation/invasion," and "deep pockets." Winners set the pace in each of these four competitive battlegrounds. Using hundreds of detailed examples from hypercompetitive industries such as computers, software, automobiles, airlines, pharmaceuticals, toys and soft drinks, D'Aveni demonstrates how hypercompetitive firms succeed in dynamic markets by disrupting the status quo and creating a continuous series of temporary advantages. They seize the initiative, D'Aveni explains, by employing a set of strategies he calls the "New 7-S's": Superior Stakeholder Satisfaction, Strategic Soothsaying, Speed, Surprise, Shifting the Rules of Competition, Signaling Strategic Intent, and Simultaneous and Sequential Thrusts. Paradoxically, firms must destroy their competitive advantages to gain advantage, D'Aveni shows. Long-term success depends not on sustaining an advantage through a static, long-term strategy, but instead on formulating a dynamic strategy for the creating, destruction, and recreation of short-term advantages. America must embrace the new reality of hypercompetition, D'Aveni concludes in a compelling analysis of the potential chilling effect of American antitrust laws on competitiveness. This masterful book, essentially an operating manual of strategy and tactics for a new era, will be required reading for managers, planners, consultants, academics, and students of hypercompetitive industries.</p>
