**This book presents current perspectives on theoretical and empirical issues related to the teaching and learning of geometry at secondary schools.**
**It contains chapters contributing to three main areas.**
**A first set of chapters examines mathematical, epistemological, and curricular perspectives.**
**A second set of chapters presents studies on geometry instruction and teacher knowledge, and a third set of chapters offers studies on geometry thinking and learning.**
**Specific research topics addressed also include teaching practice, learning trajectories, learning difficulties, technological resources, instructional design, assessments, textbook analyses, and teacher education in geometry.**
**Geometry remains an essential and critical topic in school mathematics.**
**As they learn geometry, students develop essential mathematical thinking and visualization skills and learn a language that helps them relate to and interact with the physical world.**
**Geometry has traditionally been included as a subject of study in secondary mathematics curricula, but it has also featured as a resource in out-of-school problem solving, and has been connected to various human activities such as sports, games, and artwork.**
**Furthermore, geometry often plays a role in teacher preparation, undergraduate mathematics, and at the workplace.**
**New technologies, including dynamic geometry software, computer-assisted design software, and geometric positioning systems, have provided more resources for teachers to design environments and tasks in which students can learn and use geometry.**
**In this context, research on the teaching and learning of geometry will continue to be a key element on the research agendas of mathematics educators, as researchers continue to look for ways to enhance student learning and to understand student thinking and teachers ' decision making.**
