social skills and social competence, based on decades of experience gained by the authors as researchers and professionals in psychology. The book was written for students and professionals who are involved in some way improving individuals' social skills in different contexts, such as clinical, educational, organizational and community settings. The authors present the conceptual foundations, procedures, techniques, strategies and practical guidelines for planning and conducting effective programs aimed to social skills and social competence. In the first part of the book, key concepts and fundamentals on the area are presented, as well as the basic behavioral classes of social skills and their non-verbal and paralinguistic components. The authors also propose a portfolio for the assessment of clients

social skills deficits and strengths to thereby define the aims and procedures of interventions. The second part focuses on guidelines to select and use procedures and techniques for promoting social skills and social competence. The authors present experiential activities that they created in previous interventions and that were tested in their research, showing evidence of effectiveness. Suggestions on how to evaluate participants' repertoires and how to use these ideas in intervention planning are also described. Finally, in the third part of the book, the authors go further presenting practical guidelines for planning and conducting programs and sessions to promote social skills and social competence, in either group or individual settings.

Minimize problem behavior and maximize student success! Acting-out behavior by students manifests in ways that make classroom management and teaching very challenging. Building on a model using seven phases of acting-out behavior presented in the first edition, the newly updated edition draws on new research in applied behavior analysis, sound instructional principles, and functional behavior assessment to deliver a clear roadmap for educators to design interventions in a clear, systematic, and achievable matter. Features include: Managing each phase of the acting-out cycle—from structuring the classroom, to handling escalated behavior, to recovery Case studies that distill concrete action steps from the book's concepts Checklists, tools, resources, and templates for applying the book's

External representations (pictures, diagrams, graphs, concrete models) have always been valuable tools for the science teacher. This book brings together the insights of practicing scientists, science education researchers, computer specialists, and cognitive scientists, to produce a coherent overview. It links presentations about cognitive theory, its implications for science curriculum design, and for learning and teaching in classrooms and laboratories.

historically geography has been constructed as a subject for the senior years of secondary schooling in Western Australia from 1917 to 1997. In doing so, this book contributes to the existing corpus of international research on the history of curriculum and particularly the history of geography as a senior secondary school subject. Much of it is based on primary sources, including the textbooks and atlases used, along with syllabus manuals and geography examination papers. It also provides a framework for investigating the construction of senior secondary school geography curricula in other constituencies, and could act as a model for engaging in further research in curriculum history for other school subjects state-wide, nationally and internationally. The book also makes an important contribution to the fields of

The latest advances in technology development have been particularly useful to actor-network theory as a structure for much of its research. With a socio-technical approach to the understanding of information systems and applications, the actor-network theory aims to bring support for social influence on technological innovations. Social and Professional Applications of Actor-Network Theory for Technology Development presents a platform for the approaches and implementations on the actor-network theory and its
