The Full Transcript of the Most Shocking Testimony of the Trump Era "I am ashamed that I chose to take part in concealing Mr. Trump's illicit acts. . . . I am ashamed because I know what Mr. Trump is. He is a racist. He is a conman. He is a cheat." —from Michael Cohen's Opening Statement to the House Oversight Committee "Michael Cohen . . . was just disbarred by the State Supreme Court for lying & fraud. He did bad things unrelated to Trump. He is lying in order to reduce his prison time." —President Donald J. Trump On February 27, 2019, with the world watching, Michael Cohen—former lawyer and fixer for President Donald J. Trump—took the stand in front of the House Oversight Committee and delivered one of the most sensational days of Congressional testimony in history. Not since President Richard Nixon's White House counsel John Dean turned on him during the Watergate scandal has a close Presidential associate attacked the character of the Chief of State and charged him with criminal acts. Here in one volume is living history—the hard-hitting prepared statements, the damning evidence, the salacious charges, the belligerent questioning, and the stunning revelations.

"One icy winter's evening in Budapest, a man runs straight into John Taylor as he walks home through the narrow streets. John falls over into the snow and looks up at the man's face. 'I felt very afraid. Because what I saw was me. My face looking down at me. My mouth saying sorry.' Who is the man, and how will John's life change?"

This comprehensive resource provides readers with the tools necessary to perform analysis of various waveforms for use in radar systems. It provides information about how to produce synthetic aperture (SAR) images by giving a tomographic formulation and implementation for SAR imaging. Tracking filter fundamentals, and each parameter associated with the filter and how each affects tracking performance are also presented. Various radar cross section measurement techniques are covered, along with waveform selection analysis through the study of the ambiguity function for each particular waveform from simple linear frequency modulation (LFM) waveforms to more complicated coded waveforms. The text includes the Python tool suite, which allows the reader to analyze and predict radar performance for various scenarios and applications. Also provided are MATLAB® scripts corresponding to the Python tools. The software includes a user-friendly graphical user interface (GUI) that provides visualizations of the concepts being covered. Users have full access to both the Python and MATLAB source code to modify for their application. With examples using the tool suite are given at the end of each chapter, this text gives readers a clear understanding of how important target scattering is in areas of target detection, target tracking, pulse integration, and target discrimination.

I'm about to welcome you into my world. Show you what works for me and share openly what hasn't. I hope that what you find in the pages of this book inspires you to dream up new ways to be kind to people and to think about how the game you're currently playing might be worthy of a bigger court. I hope it stretches your thinking about what's possible, and shows you that when you take giant leaps of faith, the only challenging thing will be some temporary discomfort. Are you ready to wing it? CEO and entrepreneur Emma Isaacs forgot to draw up her life plan, and she doesn't have a list of five-year goals. She doesn't believe in work/life balance - after all she has five children and heads up Business Chicks, Australia's largest community for women. Like Sheryl Sandberg, who told us to 'lean in' to find success, Emma wants to show us that you can't plan every detail and wait for the confidence to kick in before you begin; instead, take action now, do what feels right and figure the rest out as you go along. In other words, you've got to learn how to 'wing it' rather than wait. Drawing on her own life and the stories of the many men and women she has met and interviewed - from Sir Richard Branson to Bill Gates to Girlboss Sophia Amoruso - Emma tells us how to: \* Turn a dream into a job \* Turn a job into a business \* Network like a champion \* Protect your time for the things that matter \* Get fired up not ground down by the kids/career juggle, and \* Understand that sometimes failure is part of the brief. Emma shows us that often the only thing holding us back is ourselves; that you can follow your dreams; and that there's no reason not to start doing so right now. PRAISE FOR EMMA ISAACS "Emma Isaacs is a true force of nature and a role model all women can learn from" Diane von Furstenberg "Emma's energy and enthusiasm for business shine brightly" Sir Richard Branson "Winging It will show you how to map out what's important to you, stay focussed on achieving your goals and thrive" Arianna Huffington
