Unavailable for almost 20 years, a little-known Dr. Seuss book about careers gets a fresh new look! Wildly imaginative and told in rollicking rhyme, this beginning reader about careers could ONLY have been written by Dr. Seuss! Featuring a mix of real jobs (like firefighter, doctor, teacher, farmer, etc.) and Seussian ones (including perfume smeller, fishbone boner, bass-drum banger, and roller coaster owner), it will incite plenty of giggles while planting the seed of a serious idea: that everyone needs to do something in life, and there are LOTS of choices! Fully illustrated with charming new art (featuring a multicultural cast in nontraditional gender roles), this is a great choice for home and classroom use! Launched in 1957 with The Cat in the Hat and written specifically for emergent readers, Beginner Books combine an exacting blend of simple words and fun pictures that encourage children to read--all by themselves.

In the spring of 2010, Harvard Business School's graduating class asked HBS professor Clay Christensen to address them—but not on how to apply his principles and thinking to their post-HBS careers. The students wanted to know how to apply his wisdom to their personal lives. He shared with them a set of guidelines that have helped him find meaning in his own life, which led to this now-classic article. Although Christensen's thinking is rooted in his deep religious faith, these are strategies anyone can use. Since 1922, Harvard Business Review has been a leading source of breakthrough ideas in management practice. The Harvard Business Review Classics series now offers you the opportunity to make these seminal pieces a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world.

"A powerful, revealing story of hope, love, justice, and the power of reading by a man who spent thirty years on death row for a crime he didn't commit"--

This book is a collection of articles which deal with adpositions in a variety of languages and from a number of perspectives. Not only does the book cover what is traditionally treated in studies from a European and Semitic orientation – prepositions, but it presents studies on postpositions, too. The main languages dealt with in the collection are English, French and Hebrew, but there are articles devoted to other languages including Korean, Turkic languages, Armenian, Russian and Ukrainian. Adpositions are treated by some authors from a semantic perspective, by others as syntactic units, and a third group of authors distinguishes adpositions from the point of view of their pragmatic function. This work is of interest to students and researchers in theoretical and applied linguistics, as well as to those who have a special interest in any of the languages treated.

LIFE Magazine is the treasured photographic magazine that chronicled the 20th Century. It now lives on at LIFE.com, the largest, most amazing collection of professional photography on the internet. Users can browse, search and view photos of today's people and events. They have free access to share, print and post images for personal use.
