Simon Morley is selected by a secret government agency to test Einstein's theory of the past co-existing with the present and is transported back to 1880s New York

The 50th anniversary edition of the beloved classic that Stephen King has called "THE great time-travel story." Featuring a brand-new introduction by the New York Times bestselling author of Recursion, Blake Crouch. When advertising artist Si Morley is recruited to join a covert government operation exploring the possibility of time travel, he jumps at the chance to leave his mundane 20th-century existence and step into the past. But he also has another motivation for going back in time: a half-burned letter that tells of a mysterious, tragic death and ominously of "fire which will destroy the whole world." Traveling to New York City in January 1882 to investigate, he finds a Manhattan teeming with a different kind of life, the waterfront unimpeded by skyscrapers, open-air markets packed with activity, Central Park bustling with horse drawn sleighs—a city on the precipice of great things. At first, Si welcomes these trips as a temporary escape but when he falls in love with a woman he meets in the past, he must choose whether to return to modern life or live in 1882 for good. "Pure New York fun" (Alice Hoffman, New York Times bestselling author), Time and Again is meticulous recreation of New York in the late nineteenth century, exploring the possibilities of time travel to tell an ageless story of love, longing, and adventure. Finney's magnum opus has been a source of inspiration for countless science fiction writers since its first publication in 1970.

Jack Finney's beloved sequel to his classic, New York Times bestselling illustrated novel Time and Again. Simon Morley, whose logic-defying trip to the New York City of the 1880s in Time and Again has enchanted readers for twenty-five years, embarks on another trip across the borders of time. This time Reuben Prien at the secret, government-sponsored Project wants Si to leave his home in the 1880s and visit New York in 1912. Si's mission: to protect a man who is traveling across the Atlantic with vital documents that could avert World War I. So one fateful day in 1912, Si finds himself aboard the world's most famous ship...the Titanic.

#1 New York Times bestselling author Nora Roberts begins her Time and Again duology with Time Was—a story of the love between two people that transcends centuries. When the plane went down in the mountains near her cabin home, Liberty Stone rushed to the scene determined to help somehow. She encountered a miracle when she found the pilot had not only survived the crash but sustained no life-threatening injuries. Recuperating from minor wounds in his host's remote cabin, Caleb Hornblower is grateful for Liberty's care but he must return home—to the twenty-third century. The longer he remains in the past, the more uncertain his future. And as Caleb spends more time with Liberty, he realizes that if he has to give up the woman he's growing to love, he has no future.

About Time offers a delightful return to the world of time travel and light comedy that distinguished Jack Finney's all-time classic Time and Again. The protagonists of these twelve stories are well-meaning but at odds with their surroundings and their lives. The time to which they escape—through time travel—doesn't always fulfill their expectations in the way they had hoped, but sometimes, they can still find their dreams.

Time And Again by Nora Roberts released on Aug 24, 2001 is available now for purchase.

If you had one chance to change history...Where would you go? What would you do? Who would you kill? In Time and Time Again, international best-selling author Ben Elton takes readers on a thrilling journey through early 20th-Century Europe. It's the first of June 1914 and Hugh Stanton, ex-soldier and celebrated adventurer is quite literally the loneliest man on earth. No one he has ever known or loved has been born yet. Perhaps now they never will be. Stanton knows that a great and terrible war is coming. A collective suicidal madness that will destroy European civilization and bring misery to millions in the century to come. He knows this because, for him, that century is already history. Somehow he must change that history. He must prevent the war. A war that will begin with a single bullet. But can a single bullet truly corrupt an entire century? And, if so, could another single bullet save it?

Set on the Caribbean coast of South America, this love story brings together Fermina Daza, her distinguished husband, and a man who has secretly loved her for more than fifty years.

A Newbery Honor Book • Winner of the Stonewall Book Award • A National Book Award Finalist "A gentle, glowing wonder, full of love and understanding." -The New York Times Book Review Cover may vary. It's the summer before middle school and eleven-year-old Bug's best friend Moira has decided the two of them need to use the next few months to prepare. For Moira, this means figuring out the right clothes to wear, learning how to put on makeup, and deciding which boys are cuter in their yearbook photos than in real life. But none of this is all that appealing to Bug, who doesn't particularly want to spend more time trying to understand how to be a girl. Besides, there's something more important to worry about: A ghost is haunting Bug's eerie old house in rural Vermont...and maybe haunting Bug in particular. As Bug begins to untangle the mystery of who this ghost is and what they're trying to say, an altogether different truth comes to light--Bug is transgender.

There are 168 hours in a week. This book is about where the time really goes, and how we can all use it better. It's an unquestioned truth of modern life: we are starved for time. With the rise of two-income families, extreme jobs, and 24/7 connectivity, life is so frenzied we can barely find time to breathe. We tell ourselves we'd like to read more, get to the gym regularly, try new hobbies, and accomplish all kinds of goals. But then we give up because there just aren't enough hours to do it all. Or else, if we don't make excuses, we make sacrifices. To get ahead at work we spend less time with our spouses. To carve out more family time, we put off getting in shape. To train for a marathon, we cut back on sleep. There has to be a better way—and Laura Vanderkam has found one. After interviewing dozens of successful, happy people, she realized that they allocate their time differently than most of us. Instead of letting the daily grind crowd out the important stuff, they start by making sure there's time for the important stuff. They focus on what they do best and what only they can do. When plans go wrong and they run out of time, only their lesser priorities suffer. It's not always easy, but the payoff is enormous. Vanderkam shows that it really is possible to sleep eight hours a night, exercise five days a week, take piano lessons, and write a novel without giving up quality time for work, family, and other things that really matter. The key is to start with a blank slate and to fill up your 168 hours only with things that deserve your time. Of course, you probably won't read to your children at 2:00 am, or skip a Wednesday morning meeting to go hiking, but you can cut back on how much you watch TV, do laundry, or spend time on other less fulfilling activities. Vanderkam shares creative ways to rearrange your schedule to make room for the things that matter most. 168 Hours is a fun, inspiring, practical guide that will help men and women of any age, lifestyle, or career get the most out of their time and their lives.
